

FoodChain™

DataChain

Cedar Creek
COMPANY

DataChain is Cedar Creek Company's web-based module providing livestock data feedback to Producers. The system uses the kill floor data sources which has been integrated with payment system modules to obtain reports by multiple parties concurrently. Parties can obtain carcass feedback information at their convenience, such as:

- ◆ Attributes impacting carcass values - non-compliance metrics and associated costs
- ◆ Information to improve practices - positively skewed data; results to resolving non-compliant carcass trends; and performance to specifications.

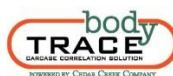

Report types available:

- ◆ **Carcass Summary** - a detailed description of the averages and ranges of each of the Procurement Criteria (eg. Carcass Weight, P8 Fat Depth, Carcass Quality), benchmarked against the performance of all other Producers.
- ◆ **Lot Summary** - provides an overview of the performance of individual cattle lots or across a selected date range.
- ◆ **Compliance Summary** - tracks the performance of carcasses against the system's payment specifications.

- ◆ **MSA Summary** - details the performance of individual cattle Lots or a selected date range. Individual characteristics that make up the MSA boning group (Ossification, Hump Height, Rib Fat, PH, Meat Colour, and Fat Colour) outcomes and reports reasons for non compliance to MSA Boning groups.
- ◆ **Livestock Slaughter Data** - HSCW, P8, dentition and bruising data is available the next working day after slaughter, to an individual carcass level.
- ◆ **Dark Cutter Report** - the incidence where meat colour exceeds company specifications for steers and heifers, by lot or date range.
- ◆ **Bruise Report** - summarises AUS-MEAT bruise scores by steers and heifers, by lot or date range.

All reports are readily printable and additional information is provided in the downloadable data files. These enhancements combine to provide producers unsurpassed detailed data for growing and business decisions.

All information is accessible for a period of two years from the day after slaughter.
